GENUINE JOHN DEERE PARTS

SERVE YOURSELF...KEEP YOUR EQUIPMENT 100% JOHN DEERE

The prices shown in this catalog are the suggested resale prices of the manufacturer. All specifications and prices are subject to change without notice.

Why you should buy Genuine John Deere Parts

At one time or another, you undoubtedly have thought—"Why should I buy Genuine John Deere Parts? Are other parts just as good? Could I save money?"

It's only natural to think these things...to want to stretch your dollars as far as possible. There are several basic reasons why **Genuine John Deere Parts** are superior...reasons you should know:

1. **John Deere Parts are designed by skilled engineers who know the requirements of the parts.**
2. **John Deere Parts are field tested to assure durability and long life.**
3. **John Deere Parts are made of high-quality materials...by skilled workmen who know their jobs.**
4. **John Deere Parts are made with modern precision manufacturing methods.**
5. **John Deere Parts must pass rigid quality inspections.**

Summing it all up in a single phrase, John Deere Parts are exact duplicates in fit, in quality, in performance of the original parts they replace.

This John Deere 1967 **GENUINE PARTS BOOKLET** is made available to help you check your equipment easily and quickly for necessary parts. Make a list of the parts needed. Keep a few "spares" on hand for fast field repairs.

We maintain a large stock of Genuine John Deere Parts, so dependable replacements can be made quickly and accurately. Our service shop is

also equipped to handle tractor and implement problems—whether it be tune-ups, major overhauls, or emergency service.

Don't accept substitute parts, or any guesswork on your service requirements—come to us for reliable and careful attention to your parts and service needs. See us on your next trip to town.

NEW! TRACTOR RADIO

Enjoy greater pleasure as you work with a new John Deere tractor radio. Check these features:

MODERN FUNCTIONAL DESIGN
COMPACT, LIGHT WEIGHT
CADMIUM-PLATED STEEL CASE
WATERPROOF CONSTRUCTION
SLANTED DIAL AND SPEAKER
RECESSED DIAL
LOW POWER REQUIREMENT
SIMPLE CONTROLS
RESISTS FARM CHEMICALS
PROTECTIVE LID
SPRING-MOUNTED ANTENNA

Here's a practical gift for the man at your house. See us for full details on how to install this value-packed radio on your tractor.

ECONOMY MUFFLERS

These economy mufflers are made of aluminized steel for long life at low cost. The special baffle design provides positive muffling and helps regulate back pressure to allow valves greater freedom and permit engine to deliver full horsepower. Don't buy a "straight-through" muffler. See us.

Tractors	Muffler	Price
B, 50, 520.....	R21827R	\$5.05
A, G, 60, 70, 620, 720..	R21826R	5.30

ROUND MUFFLERS

Stainless steel center tube and baffle outlast others two to one

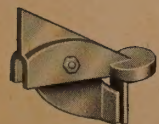

John Deere Mufflers are carefully manufactured from a highly heat-resistant and non-corrosive material to insure greater capacity and longer service. The arc-welded seams are gas and watertight to last longer and insure quieter exhaust. The greater baffle area screens out the noise, dissipates heat faster, and deadens live sparks. A coat of heat-resistant paint protects the outer surface. You can depend on John Deere Mufflers to outlast "ordinary" mufflers two to one.

Tractor	Muffler	Price

MUFFLER COVERS keep out rain and moisture

These streamlined muffler covers automatically close the exhaust opening whenever the tractor engine is stopped. The slightest exhaust pressure raises the cover. Keeping moisture from entering the exhaust helps prevent rusted-out mufflers, and protects engine parts. Simple and easy to install.

OVAL MUFFLERS

Super silent... maximum visibility

The oval muffler was designed to handle the increased volume and hotter exhaust gases caused by increased tractor horsepower. The greater area of the oval muffler means a 30% reduction of muffler noise. The aluminized steel center tube and baffle plate, faster dissipation of heat, and special heat-resistant paints contribute to extended muffler life. Oval mufflers are available for older tractors—check the chart below:

Tractor	Muffler	Price

OIL FILTER ELEMENTS

Save repair bills... reduce wear

Buy the filter element made especially for John Deere. This element properly filters the oil to reduce engine wear, save costly repair bills, and prolong engine efficiency.

The generous amount of resin-treated paper used provides a large-filtering area. This element also resists heat, water, and acid; yet will not remove additives and detergents. Buy a supply today—keep them on hand!

PULLEY BRAKE LINING WITH ADAPTER 97¢

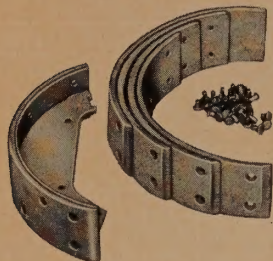

Saves time . . . no riveting

Here's a time saver. The pulley brake lining with adapter is attached in a jiffy without riveting. Simply replace the old lining by bending over the clamps at the sides and ends of the adapter and you're ready to go.

Tractor	Lining
A, B, D, G, R, 50, 60, 70, 80, 520, 530, 620, 630, 720, 730, 820, 830.....	AB4748R

BRAKE SHOES AND LININGS

Brake shoes complete with linings or sets of brake linings with rivets are available to completely recondition your brakes. John Deere Brake Linings are high-grade asbestos to resist heat and provide safe, smooth stops. A tough, flexible bonding agent holds the lining material together under the heaviest loads. Extra-big rivets with wide, flat, countersunk heads positively hold the linings from loosening or pulling out.

For quick, safe stops and dependable braking on sharp turns, install new John Deere Brake Linings.

COVERS FOR SEAT CUSHIONS AND SEAT BACKS

John Deere Covers for cushions (shown above) are made of tough yellow vinyl material that matches the covers on the tractor. This material is soft, yet tough. The quality is excellent and resists cracking, tearing, and weathering. Seams are sewn with nylon thread, double stitched. The upper seat back cover is slipped over the back and zippered. The lower seat back cover is slipped over the back, and securely fastened with snaps. The seat cushion cover is held in place by a draw string that can be securely tied on the underside. Double the life of the seat cushion and backs by installing a set today.

\$2.97

These easy-to-attach seat-back cushion covers provide additional comfort and improve tractor appearance.

A stiff rubber welt fits over the edge of the regular cushion back-plate and can be installed over the top of the old riveted-on cover. Just a few minutes' time and a minimum of effort and the cover's on. Ask for AR21913R (yellow) or AR21914R (black).

SEAT ARM CUSHIONS FOR REGULAR SEATS

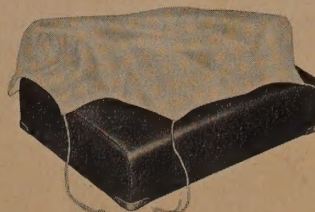

\$12.58

For added driver comfort, install a set of these soft, comfortable arm rests. Made of foam-rubber, they snap quickly in place on the seat arms, and provide added protection for your hips and thighs when working on rough, hilly ground. Available in black or yellow to match your cushion.

Pair of Seat Arm Cushions

SUMMER ENGINE COOLANT CONDITIONER

\$2.10

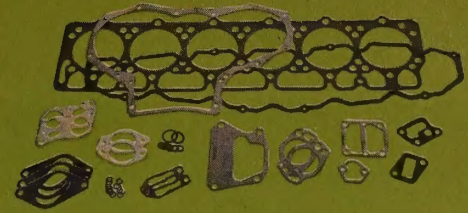

Here's protection for engine cooling systems during warm temperatures when water is used as the coolant. Prevents rust and corrosion for 12-month periods. Ask for Coolant T19566T in 32 oz. can. Check the chart below for quantity needed:

Capacity Cooling System	Cans Needed
Up to 16 qt.	One
17 to 37 qt.	Two
Above 37 qt.	Three

STARTING FLUID

87¢

Improves starting by injecting fluid (ether) directly into the intake manifold. Prolongs battery life for easier starting in cold weather. Part No. AR27814R.

GASKET SETS

Valve replacement... engine tune-up... governor overhaul... carburetor overhaul

All gaskets necessary for valve replacement, engine tune-ups, governor and carburetor overhaul are packaged in complete sets for easy, low-cost tractor maintenance. Same as original equipment, these gaskets are made of the best materials available for their particular application. Each gasket is the proper size for exact fit to insure correct sealing. Additional gasket sets for complete engine, transmission, and rear-end overhaul also available.

*"Only Genuine John Deere Parts
Fit and Wear Like the Originals"*

CYLINDER BLOCKS AND PISTONS

John Deere cylinder blocks and pistons provide the best engine efficiency and economy of operation. They are designed specifically for each tractor's requirement.

Beware of "souping up" your John Deere Tractor by installing extra diameter or extra length pistons in oversize blocks to gain more power. This can cause increased fuel consumption, unnecessary spark plug replacement, overload on transmission and final drive parts, and excessive detonation. See us for the replacement parts designed to give you the most economical power!

EXHAUST VALVE ROTATORS

Cooler operation...
longer valve life

Rotating the exhaust valves each time they open and close helps prevent burning and sticking. Valves operate cooler and last longer. A new spring is required when rotators are installed to insure proper spring pressure.

PISTON RING SETS

Sluggish tractor performance, lost power, and excessive oil consumption are definite symptoms of worn-out rings. The quality of the rings, proper size, and type are the most important factors of a satisfactory ring job. Only one type of ring is factory-approved for John Deere Tractors — Genuine John Deere Piston Rings. These Genuine Rings assure correct compression and oil control. They are built for longer life, greater economy and dependable performance. Don't accept substitutes; insist on Genuine John Deere Piston Rings which are tailor-made for the job requirements.

PISTONS

Some parts suppliers have available unapproved extra-length pistons for John Deere Engines that develop extremely high compression ratios in the anticipation of getting more horsepower. The higher compression ratios created by longer pistons oftentimes cause excessive detonation (ping), pitting and burning of the piston head, and actu-

ally a loss of power instead of an increase. Furthermore, these pistons cost much more than the Genuine for replacement. There is usually an additional cost resulting from the premature failure of cylinder head gaskets, valves, and spark plugs due to the excessive heat and pressure.

To make sure you receive pistons that will give satisfactory service as well as pistons that are especially designed for your engine, buy only Genuine John Deere Pistons.

VALVES, GUIDES, SPRINGS, AND LOCKS

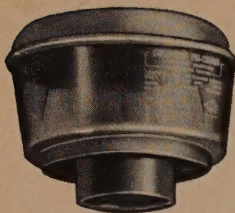

Smoother operation... lower fuel costs

John Deere Valves are carefully designed and tested for each individual tractor to give maximum performance and economy. They are made from a special alloy steel that resists distortion, corrosion, and pitting at high operating temperatures. The valves are hardened to give long life and dependable service.

PRE-CLEANERS

Improve and prolong tractor engine performance by removing dust, dirt, sand, and other material from the air before it reaches the air cleaner. The clear, non-breakable plastic design allows you to quickly check the amount of dirt accumulated, removal and cleaning is an easy job. Install one today for those extra dirty, dusty jobs.

Tractor	Pre-Cleaner	Price

FUEL BOWLS

Heat resistant... reduce fire hazard

Look for the words "heat resistant" stamped on the bottom of John Deere Fuel Bowls. This is the extra safety factor that practically eliminates the spreading of fires. John Deere Fuel Bowls resist heat and flame without bursting or cracking. Don't buy a "bargain" fuel bowl; insist on the heat-resistant John Deere.

Tractor	Fuel Bowl	Price

PRE-SCREENERS

For pre-cleaner

To prevent large particles of dirt, leaves, trash, and chaff from entering the pre-cleaners, this pre-screener is available. It provides the ultimate in pre-cleaning by reducing the amount of foreign material collected, reducing the frequency of servicing, and helping to insure clean air.

Tractor	Pre-Screener	Price
520, 530, 620, 630, 720, 730	AR21789R	\$ 6.99

CLEANER FOR DRY-TYPE AIR-CLEANER FILTER ELEMENTS

Restore your elements to like-new condition with this specially compounded formula of non-sudsing detergent. It helps remove dust and carbon deposits easily and safely.

Cleaner	Price
R36757R 4 lb. container	\$2.97

CARBURETOR CHOKE KITS

Quicker starting... faster warm-up

The necessary parts for a fast overhaul of the choke portion of the carburetor are available in a low-cost package. You will get quicker starting, faster warm-up, and save fuel by keeping the carburetor choke in tip-top operating condition.

*Identify carburetors by the manufacturer's number on the carburetor to be serviced to determine proper kit to order.

†These carburetors are no longer furnished. Check with your John Deere dealer for correct replacement.

TRACTOR PARTS

DISTRIBUTOR IGNITION POINTS AND CONDENSERS

Quick starts... smoother operation

Easier starting... smoother, snappier action... greater fuel economy... longer ignition system life... these are features of John Deere Ignition Points.

These ignition points have a stainless steel, rust-resistant spring, and tungsten contact points that resist heat and pitting.

The condensers, which have been pre-tested for correct current capacity, are moisture- and vibration-proof.

Type Equipment	Condenser	Price	Point Set	Price	Point Set & Cond. Kit	Price

TRACTOR AND IMPLEMENT WARNING LAMPS \$20.53

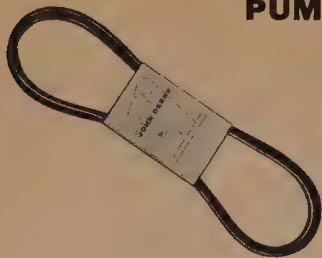

To help prevent accidents, tractor warning lamps and companion implement warning lamps are available. Protect yourself and others on the highway at night with these safety lamps. Both lamps throw beams for 500 feet; amber light in front; red light to rear and at 90-degree angles.

See us about the complete line of tractor warning lamps that can be swung overhead on hilly roads or out of way when not in use. The implement warning lamp plugs into the tractor electrical outlet, and we have extra brackets for the various implements. Ask for AR40708 warning lamp for towed implements. Installation is quick and easy.

WEATHER BRAKES, SHIELDS AND CABS

Want a weather shield tailored exactly to your tractor or combine? We have a complete line of the finest and most streamlined weather brakes, shields, and cabs. You'll be surprised at their low cost.

REMOTE HYDRAULIC CYLINDERS

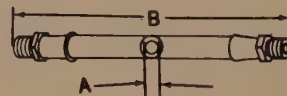

Double acting... heavy-duty

These husky John Deere Remote Cylinders provide positive hydraulic control. The cylinders are double-acting and provide two-way pressure for use with drawn as well as mounted implements. An adjustable depth stop provides exact control of implement working depth. The cylinders are easy to handle, easy to hook up, and are quality built for long life.

Size	Cable
25 ft.....	AR40710

UMBRELLAS

John Deere Umbrellas are available in the popular Tilt-A-Shade and Bent-Shaft types. Tilt-A-Shade can be slanted to any angle; Bent-Shaft style features patented, separable extension arm which can be unscrewed and swung away when not in use. They are easy to attach and adjust . . . custom made for John Deere Tractors and Combines. Ask to see a John Deere umbrella next time you're in, and stay cool on hot days. It also saves many a soaking from sudden summer showers.

Part No.	Description	Price

TY2001	Bent-Shaft Umbrella	13.71
TY2002	Universal Bracket	3.10
TY2106	Cover, Tilt-A-Shade	7.64
TY2117	Cover, Bent-Shaft	7.00

SUN SHADES

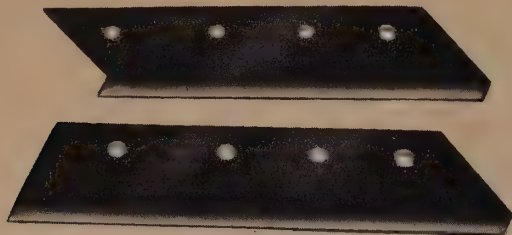

The new John Deere Sun Shade is versatile, long lasting, and comfortable. It can be adjusted from the seat to any position. The yellow vinyl coated nylon canopy fits snugly over the black satin-finished frame. This canopy provides superior heat and cold protection, resists weathering, abrasion, mildew, and chemicals. It is also waterproof and light weight. There are no stays or rods at eye level to obstruct vision.

Description	Price
Fender Mount, TY2014 (2-Way Control)	\$29.55
Axle Mount, TY2015 (2-Way Control)	29.55
Canopy, only, TY2139..	7.49

TILLAGE PARTS

SOIL-FLOW PLOWSHARES

Faster, easier, low-cost plowing

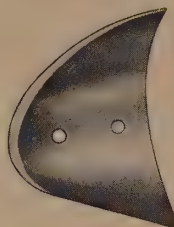

A complete line of John Deere Soil-Flow Shares provides a quality job of plowing in all types of soils. Made from $\frac{5}{16}$ " and $\frac{3}{8}$ " fine grain-hardened steel in both 14" and 16" sizes, shares are available in full cut for shallow plowing in sod, as well as soils where tap roots must be cut; and narrow cut for plowing in all other soil conditions. They offer lower cost, lighter draft, and better penetration. The deep-suck share is heavier, withstands tremendous shock loads, and provides better penetration in hard, dry ground. Hard-faced shares are available for use in extremely abrasive soils where rapid wear occurs. Remember, good plowing depends on the condition of your shares. Replace them now.

GUARANTEED EXTRA-HEAVY-DUTY PLOWSHARES

Here are extra-heavy-duty shares in right-hand 14-inch and 16-inch sizes. Each carton of six (6) carries an individual guarantee against breakage. The conditions of guarantee are included on each carton. These shares are especially designed for larger plows operating in rocky areas. Included in each carton are new heavy-duty bolts and nuts for the front hole in the share to provide sufficient strength when striking solid obstructions.

WEED HOOKS \$2.40

Install weed hooks for covering heavy compact trash, green manure, and plowing down rank cover crops.

Part No..... BA10113A

SHARES FOR LISTERS, MIDDLEBREAKERS

John Deere heavy-duty, one-piece shares have milled joint edges for better fit and more strength. Each share is properly shaped for uniform width, thickness, and length.

The forged sharp points provide better penetration for faster, easier work. See us for Genuine shares designed for your listers and middlebreakers.

TEETH FOR SPRING-TOOTH HARROWS

Four types of interchangeable teeth are available, with all but the alfalfa-renovating teeth furnished in regular and heavy-duty types. You may choose utility teeth for general-purpose work, weeding teeth for killing quack-grass and other pests, reversible spear-point for use in abrasive soils, or alfalfa-renovating teeth.

These teeth are made of high-carbon spring steel, heat-treated and tempered for aggressive tillage and long, dependable service.

RUNNER AND WEAR SHOES FOR SPRING-TOOTH HARROWS

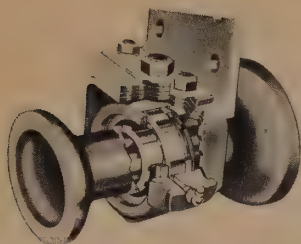

Runner and wear shoes are extra-wide for longer service in abrasive soils and for added flotation in soft or loose soils. The runner shoes are reversible for double life and replaceable at moderate cost.

As further protection, front wear shoes overlap and shield the front bends of the runners, points of greatest soil abrasion. They are adjustable, adding to their effective life, and are replaced easily at low cost.

TILLAGE PARTS

ANTI-FRICTION BEARINGS FOR OFFSET-TYPE DISK HARROW \$28.94

These anti-friction bearings provide free-rolling gangs and reduce friction and drag. They're self-aligning bearings, with a unique pivot and yoke which permit the assembly to align itself horizontally or vertically, thereby reducing the strain. A triple seal on each side of the bearing prevents dirt from entering the bearings. Replace old bearings with new grease-packed ball bearing assemblies. Adaptable on harrows having 9 1/8" spacing and 1 1/8" gang bolt. Ask for Part No AK34176K.

DISK HARROW BLADES

Solid ... Cut-Out

Knowing there is no substitute for quality, John Deere offers the highest-quality disk blades. Built to stand up under the most grueling work... John Deere Disk Blades handle the job, particularly when the going gets rough. They have a keen cutting edge and are wear-resistant to help assure long life. Every John Deere Blade is hardened and tempered for longer wear and to resist shock. For faster, deeper penetration and weed-free seedbeds, insist on genuine John Deere Disk Blades.

"Only Genuine John Deere Parts Fit and Wear Like the Originals"

**RUBBER PRESS
WHEEL TIRES**

**TRACTION
TREAD**

SMOOTH

These semi-pneumatic rubber tires for the press wheels are especially desirable when planting in wet, sticky soil that would cling and ball up on the steel press wheel. The flexing action of the rubber does a good job of shedding the soil to promote a better job of packing the soil over the seed. The rubber tires also improve flotation in soft, loose seedbeds. Let us show you the new B16049B traction tread tire.

Tire Size	Description	Price
B16048B 7" x 18" Smooth.....	For 18" Open Center	\$16.40

Grass Seed Tube.....	M19356M	8¢

POWDERED GRAPHITE \$1.50

Lubricating planter hopper bottom parts, seed plates, and valves is essential to provide trouble-free, easier operation and longer wear at today's high planting speeds. Simply sprinkle a teaspoonful of graphite over the seed each time the hopper is filled. Buy your supply now! Ask for B13243B graphite packaged in one-pound cans.

FIBERGLASS SERVICE KIT \$2.05

Here's a money saver! This kit is for minor repairs and small leaks on sprayer and planter fiberglass tanks. The AB13919B kit contains all of the necessary materials and instructions.

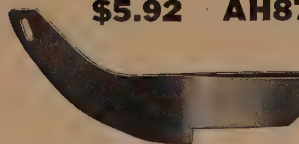

SEED PLATES

Accurate planting... complete line available

Whatever the shape of the seed may be — flat or oblong, round or pointed, large or small, or any combination of these — there are John Deere Seed Plates available to plant most seeds... efficiently... accurately! See us before you plant. Let us help you select the proper seed plates for the kind of seed you are going to plant. Using the right seed plates means higher yields and a more accurate stand. We have a full selection of seed plates and false rings.

\$5.92 AH871B PLANTER RUNNERS

Precision planting... longer wearing.

Worn runners cause scattered seed, poor seed coverage, and irregular yields.

John Deere Planter Runners are made to precise dimensions for proper penetration, good seed coverage, greater strength, and longer wear. Genuine runners are straight to assure a good straight row and prevent planter swerve.

PLANTER HOPPER SERVICE KIT

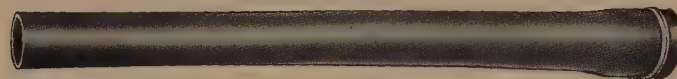

\$1.65

Cut-off tongues... roller knockers... wheels... springs

For greater planting accuracy, install a set of these planter hopper parts. Kit number AY932B contains the necessary parts for two hoppers.

NEOPRENE TUBES

Grain drills... planters

SMOOTH

CONVOLUTE

Neoprene tubes last three times longer than other types. They are flexible and noncollapsible to prevent caking and clogging, and insure a steady flow of seed or fertilizer. This material withstands all weather conditions. Smooth and convolute tubes are available. Select your needs below:

FURROW OPENER SEALS and LUBRICANT KIT \$2.37

This new kit contains eight rubber seals and sufficient lubricant for installation. Keep your Anti-Friction Bearing Furrow Openers in tip-top operating condition. Each kit has complete service instructions and illustrations on the back of the card. Ask for AM13000M.

COVER CHAIN FOR GRAIN DRILLS 96¢

Replace those worn, broken, or lost cover chains to provide adequate seed coverage and insure better yields. Ask for part number BB3339M.

RUBBER TIRE FOR GANG PRESS WHEEL

These semi-pneumatic tires for gang press wheels are self-cleaning and help pack soil that is light and loose. This prevents blowing and drifting of soil yet firmly packs the soil over the planted seed.

Keep your sprayer in tip-top shape. Stamp out weeds and insects before they steal your good stands, high yields, and high-quality crops. Check your sprayer now for needed parts.

Sprayer hoses are made of chemical-resistant rubber with a durable outer surface, highly resistant to abrasion and wear . . . stand up under hard use in the field. These heavy-duty, flexible hoses resist deterioration and have a long service life. Roller

pumps designed for specific jobs give high capacity spray delivery, smooth operation and constant pressure at all travel speeds.

Hand guns are made of brass . . . highly resistant to rust and corrosion. Just twist the handle to adjust spray all the way from a fine fog to a solid jet stream.

*"Only Genuine John Deere Parts
Fit and Wear Like the Originals"*

SWEEPS FOR ROW-CROP TRACTOR CULTIVATORS

John Deere Sweeps and Shovels are quality built and heat treated to do better work, give instant scouring and last longer. *Plus Low, Low Prices without Sacrifice in Quality!*

UNIVERSAL SWEEPS

This is a new line of highly polished sweeps that give instant scouring at economy prices. They have a low crown, a narrow shank, and a low wing angle for high speed cultivation. Sizes 5" through 10" are $\frac{3}{16}$ " thick, 12" through 16" are $\frac{1}{4}$ " thick with 2" hole spacing.

Size (Inches)	Sweep	Price	Size (Inches)	Sweep	Price
5	N61108N, R.H. Half	93¢	8	N61101N	\$1.01
5	N61109N, L.H. Half	93¢	10	N61102N	1.12
6	N61110N	93¢	12	N61103N	1.52

6½	N61107N, L.H. ¾	99¢	16	N61105N	2.44

MIXED-LAND SWEEPS

Mixed-land sweeps have a high, broad crown, high-wing angle, and wide shank for throwing a large amount of soil and leaving a loose, mulched, mellow topsoil. They have a tumble blast finish. These sweeps are made from $\frac{1}{4}$ " stock with 2" hole spacing.

Size (Inches)	Sweep	Price	Size (Inches)	Sweep	Price

8	Y803AN	1.14			

BLACKLAND SWEEPS

Blackland sweeps are long and narrow with a high crown, a high-wing angle, and a tumble blast finish. They are designed for areas where scouring is difficult, and are excellent for hilling and ridging cotton beds. Sizes 4" through 10" are $\frac{3}{16}$ " thick, 12" through 20" are $\frac{1}{4}$ " thick with 2" hole spacing.

Size (Inches)	Sweep	Price	Size (Inches)	Sweep	Price

3 x 11	1¼ to 2¼	Y980N, ¼" Thick	96¢

BOLT SETS FOR SWEEPS

Two plow bolts, two nuts and two washers make a complete set for each sweep and are plated to prevent rust. Ask for CA1959AN. **30¢**

If you use only one carriage bolt, washer and nut for the center hole, buy CA1958AN. **27¢**

SINGLE-SPRING TEETH

Single-spring teeth are $\frac{5}{16}$ " thick and available in 1¾" and 2¼" width. They are made of high-carbon steel and for average cultivating conditions.

Width	Single-Spring Tooth	Price
1¾"	16035AN	\$2.37
2¼"	21788AN	3.60

DOUBLE-SPRING TEETH

Double-spring teeth are for tough soils and severe cultivating conditions. Teeth and inner springs are high-carbon steel, 1¾" wide, in ¼" and ⅝" thickness.

Thickness	Shank Complete	Price	Spring Inner	Price	Spring Outer	Price
¼"	CA2037AN	\$6.66	20320AN	\$2.30	20321AN	\$2.30
⅝"	AN130092	7.93	N130074	2.95	N130075	2.95

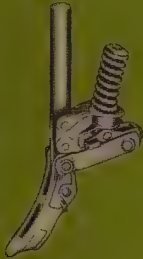

SPRING-TRIP SHANKS

Spring-trip shanks were designed and developed for high-speed tractor cultivation to absorb the shock of striking obstructions. The shock is absorbed by the tension spring, which automatically permits the tool to "trip" back when the obstacle is cleared. Straight and offset shanks are available.

1 3/8" Shank			1 1/2" Shank		
Straight	Price	1 1/2" Offset	Price	Straight	Price
CA466AN	\$7.79	CA501AN, R.H. CA504AN, L.H.	\$8.29 8.29	CA523AN	\$8.84

QUICK-ADJUSTABLE SPRING-TRIP SHANKS

The major advantage of this shank over the spring-trip shank above is the quick adjustment to change the angle or "suck" of the sweep or shovel. The adjusting bolt quickly and accurately adjusts the angle of sweep or shovel to meet soil conditions.

Straight	Price	Offset	Price
CA497AN	\$9.99	CA2194AN, R.H. CA2198AN, L.H.	\$10.41 10.41

FRICTION-TRIP SHANKS

Friction-trip shanks are a low cost investment that provides satisfactory protection where obstructions are seldom encountered. They are reset by hand.

Straight Shank	1 1/2" Offset				
	Price	R.H.	Price	L.H.	Price
CA3263N	\$5.59	AN61094N	\$6.40	AN61095N	\$6.40

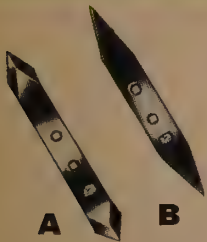

SHANK CLAMPS

These clamps are furnished complete with bolts, and securely hold the shanks for correct alignment.

Description	Price
For 1 1/2" Rig Use CA3564N Clamp	\$5.41
For 1 3/8" Rig Use CA3563N Clamp	5.54

CHISELS AND SPIKES

Used on toolbars and chisel plows, these chisels (A) and spikes (B) do a thorough job of weed eradication and opening up soil for better water penetration. These heavy-duty, high-carbon, forging-type steel points are reversible for extra long life.

Type	Size	Thickness	Hole Spacing	Part No.	Price

A	2" x 16"	5/8"	2 1/4"	Y917N	1.89

6-INCH CHISEL SWEEP \$1.27

This new 6-inch chisel sweep for tool bars and chisel plows is used for weed eradication or heavy straw deposits. Wrap-around shank for extra strength, lighter draft, and ribbed point for longer wear are some of the features of this sweep. These sweeps are made from 1/4" stock with 2 1/4" hole spacing. Ask for N61113N.

WHEATLAND SWEEPS

The Wheatland Sweeps are designed for stubble-mulching. The wing angle and contour are shaped to stir the soil, shear off weed roots and leave a loose top mulch to control soil erosion and conserve moisture. High carbon steel and wrap-around shank provide maximum strength. These sweeps have 2 1/4" hole spacing.

Sweep

This shank is made from 1 3/8" cold-rolled round bar and is complete with attaching bolts. Ask for AN61142N.

\$3.10

HEAVY-DUTY VEGETABLE CULTIVATING STANDARDS AND CLAMP

This new line of standards is $\frac{5}{8}$ " x 2" spring steel heat treated for greater strength. They are 30-inches long to provide adequate clearance for high-growing crops. The K39280 standard for sweeps or shovels has holes on the opposite end for attaching side knives providing dual use. The AK39385 clamp attaches these standards to 2" or 2 $\frac{1}{4}$ " square tool bars.

KNOTTER PARTS AND NEEDLES

For tight, longer-lasting knots

Each knotter used on John Deere Balers is made of precision-built parts that work together smoothly and quietly to tie better, tighter bales... bale after bale. Bill hooks, knife arms, twine knife, and baler needles... all are manufactured to closest tolerances, assuring accurate, dependable tying. Only tight, non-slip knots are made, which means better bales that hold together during rough handling.

STRIPPER MODELING TOOL \$1.80

The stripper modeling tool enables you to properly align strippers which have become bent or misaligned,

thus permitting free movement of the side delivery rake teeth. Ask for BE10121E.

"Only Genuine John Deere Parts Fit and Wear Like the Originals"

MOWER PARTS

KNIVES

Clean cutting... smooth or serrated... regular, chromed

Heavy-duty knife heads, precision ground sections that are razor sharp and evenly hardened, and expert workmanship are combined to give you complete assemblies ready to go to work. No adjustment corrects a badly worn knife. Avoid costly field

stops by installing a new knife, and keep a spare on hand! Chromed sections and knives stay sharp longer, are non-gumming, rust resistant, smoother running and longer wearing. Try them—you will mow more acres at less cost.

MOWER PARTS

SECTIONS

Heat-treated... tough... sharp...
regular, chromed

Smooth or serrated, John Deere Sections stay sharp longer. The use of high-carbon steel, the even hardness pattern on the cutting edges, the tough center for resisting shocks, the razor-sharp cutting edges, and constant quality checks insure you better, cleaner cutting for longer periods. Chromed sections increase life—yet cost only a few cents more. Sections are packed twenty-five to a carton... buy a couple of cartons today!

MOWER GUARDS

Regular malleable... forged steel rock... two-tine

Each is well suited to a variety of conditions. Greater strength, slim smooth design for better penetration, correct lip shape, and tight fit assure cleaner shearing action for a first-class mowing job. The rock guards have square heels to help keep the guards in alignment... even under heavy impacts. The forged steel two-tine guard without a guard plate gives maximum penetration in heavy tangled crops. The guard is streamlined for reduced ground resistance and less cutter bar drag. Replace those bent and broken guards now with John Deere Guards that are designed for tough mowing conditions. Single guards are furnished with beveled-edge guard plates that wear sharp.

Type	Inside	Price	Outside	Price
Regular Malleable.....	Z463H	\$1.32	Z463H	\$1.32
Forged Steel Rock.....	AZ2131H	2.20	AZ2132H	2.22
Two-Tine	E33940	2.59		

GUARD PLATES

High carbon steel... heat-treated... regular or chromed

These guard plates are tough and long wearing. The cutting edges are hardened, while the core is left tough to prevent breaking and cracking. The beveled serrated edges stay sharp for clean shearing action.

Type	Part No.	Price
Regular.....	Z5110H	19¢
Chromed.....	H21532H	26¢
Outer Shoe.....	Z5204H	19¢

MOWER GUARD WITH SNAP-IN GUARD PLATE

Here's a timesaver! Guard plates can now be replaced on the mower in a few seconds. There are no pins or rivets. The new malleable guard has a lip wider than the guard plate. The wide guard lip holds material properly for shear cutting and protects the cutting surface of the guard plate against damage—longer guard plate life.

Only chromed beveled edge guard plates are used. They wear sharp, resist gumming, and are rust resistant—assuring smooth, efficient cutting action. Buy a complete set—modernize your cutter bar and save mowing time.

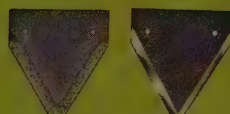

Part No.	Description	Price

DAWSON PROCESS ARMORED SECTIONS

BOTTOM TOP
Note the hard-surface pattern on the bottom view.

Here's a John Deere exclusive

They last up to 4 times longer. The incredible hard surface of the cutting edges are highly resistant to damage from stones or other foreign material—breakage is practically nil.

The sections not only require less frequent sharpening but can be resharpened from the bevel side without grinding back beyond a "rounded" bottom edge prevalent on other sections. The bottom edge remains sharp and you get clean, shear cutting acre after acre. Increase your mowing capacity per day by installing new John Deere Dawson process sections.

Mower	Knife	Price	Section	Price

WEARING PLATES 57¢

Hardness... file hardness... is the big reason for the longer wearing service provided by John Deere Wearing Plates. It's actually just that... hardness that resists filing to last longer and perform better. Each part is carefully trimmed to fit better and provide a smoother surface for the knife. Order part number Z5926H and put your cutter bar in like-new condition.

PITMANS

Complete... wood only

Straight-grained hickory, famed for its toughness and flexibility, is used in John Deere Mower Pitmans. Always in adjustment, wear is taken up automatically as it occurs between the pitman straps and knife head. John Deere Pitmans are easy on... easy off.

Mower	Complete	Price	Wood, Only	Price
5 (Regular)	AZ2497H	\$16.64	Z9298H	\$1.89

*Less bearing box.

GUARD BOLTS

John Deere Guard Bolts are plated, heat treated and have high strength for positive holding of guards and knife holders. Extra thick nuts are used to insure a tight, snug fit. The additional height of the nut prevents wrench slippage, is safer, and provides a positive method of tightening guards. Keep a supply on hand.

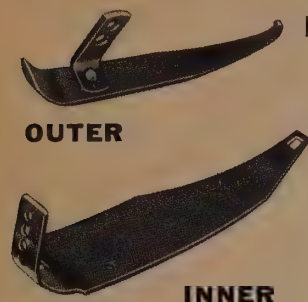

Guard Bolt	Part No.	Price
For Guard only (Short).....	AA14821	20¢
For Guard and Knife Holder (Long).....	AA14822	20¢
Extra Thick Nut or Guard Bolt.....	A15498	6¢

KNIFE HEADS

Extra strength, plus the patented no-bind feature, makes this part an outstanding field performer. The recess beneath the ball eliminates binding by allowing the pitman straps a greater swivel range around the ball, and gives John Deere Knife Heads a great superiority over others.

Mower	Knife Head	Price

10.....	AH15458H	6.29

MOWER SHOE SUBSOLES

Both inner and outer John Deere Subsoles are adjustable to vary the height of cut. Made from high-carbon, flat steel, each subsole is formed accurately to the shape of the mower shoe for exact fit and even weight distribution. Formed while red hot, they are cooled slowly to add toughness and prevent breakage.

MOWER PARTS

PITMAN STRAPS

\$2.35

Many pitman straps are made of malleable iron, but John Deere Straps are forged steel. Hardened forged steel wears many times longer, and is much stronger than malleable iron. For best results, replace in pairs.

Mower	Pitman Strap	
	Front	Rear
5, 20, 20A, 51.....	H22717H	Z9916H
8, 9, 11, 37, 38, 39.....	H22717H	H22718H

GRASS BOARD

\$4.91

Made from straight-grained oak, these John Deere Grass Boards are tough to withstand splitting and breakage. Each board is smoothly finished to reduce friction. Ask for AH12932H.

MOWER LIFTING GUARD

Save down, badly lodged or tangled crops by equipping your mower with John Deere Lifting Guards. Designed with sufficient strength to withstand field shocks, their streamlined, adjustable points gently glide under and lift the crop so it can be cut... saving grain which would otherwise be lost. Ask for AZ2293H.

\$5.78

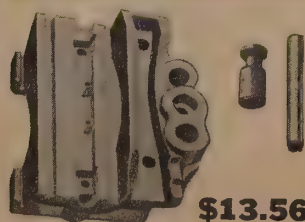

RIVETS

Section... guard plate... pitman straps... knife heads

Special cartons of rivets are available for quick replacement jobs. Keep a supply on hand.

GUARD AND KNIFE REPAIR BLOCK

This convenient block, which fits any guard or knife, makes a quick, easy job of replacing guard plates, guards, sections, and straightening knives. Part number AP17210H.

\$13.56

COMBINE PARTS

KNIFE HEADS

Replace worn knife heads with a specially designed head that is made extra strong for the job. John Deere One-Piece Knife Heads wear longer and fit right.

KNIFE HEAD GUIDES

Worn knife head guides permit loose knife head operation, causing unnecessary wear and "pounding." Take up this looseness with new knife head guides and eliminate poor cutting and excessive noise.

SPIKE TOOTH CYLINDER TEETH 47¢

Your combine threshing efficiency is greatly reduced when the cylinder teeth become worn or broken. Check your cylinder and order a supply of part number P44H (Regular), H33286H (Thin), Cylinder teeth, 14H865 Nut (3¢) and 12H301 Lock Washer (2¢).

SECTIONS

Regular, Chromed, or Armored

John Deere Combine Sections have built-in quality that assures cleaner cutting... more grain in the tank. They're made from high-carbon steel; cutting edges are evenly hardened by electric heat induction for clean cutting and longer life. The center of each section is left relatively soft, but extremely tough, to absorb field shocks. Get your combine in top working order, so you'll be ready for harvest. Replace those worn or chipped sections for clean, sharp cutting. Keep an extra carton of 25 on hand.

RASP BARS

Replace your worn rasp bars with Genuine John Deere Rasp Bars for more aggressive, thorough threshing action with less cracking and damage to the crop. These bars are sturdy, long-wearing parts made from corrugated rolled steel. Your combine cannot thresh properly with worn or damaged rasp bars. To maintain correct balance, always replace two bars — one directly opposite the other.

SPREADER PARTS

SPREADER BEATER BARS AND TEETH

Keep your spreader in full-capacity operating condition by replacing those broken or worn beater bars and teeth. Your spreader will do a better job of shredding the manure and distributing it evenly. The heavy-duty (1/2-inch) teeth have blunt ends to provide more aggressive tearing action.

GATHERER CHAINS

John Deere Gatherer Chains are big capacity and long wearing with self-cleaning lugs. Two types—detachable link and roller—are available for pickers. The roller-types have greater strength, longer life, less stretch, more load-carrying capacity and smoother, quieter running with less wear.

SNAPPING ROLLS

Furnished Complete with Gudgeons

Shelling losses mean profit losses. The new spiral fluted snapping rolls cut shelling loss in half. They are smoothly aggressive with stalks, yet gentle with ears. The smooth spiral ribs act like a built-in snapping bar shielding ears from damage. Any reluctant stalks are forced through by the high lugs and cams at the top of the roll. Regular equipment on new pickers—can be installed on older pickers. Lug-type are still available for extreme picking conditions requiring unusual aggressiveness.

RUBBER HUSKING ROLLS

Faster, cleaner husking; less mutilation of ears—better crib sample; good work longer—husk more acres; less clogging—save time, money, and wear; solid rubber construction with steel core; these are the features of John Deere Rubber Husking Rolls.

TIRE CARCASS TYPE HUSKING ROLLS

Serrated... smooth

These tire carcass type rolls are designed for conditions requiring more aggressive husking. They are especially effective in dry trashy fields. They are completely interchangeable with the rubber husking rolls.

COTTON PICKER PARTS

LUBRICANT FOR COTTON PICKER SPINDLES

John Deere Spindle Lube provides dependable lubrication; picker runs cooler, smoother and quiet. Less down time—more cotton picked.

Part No.	Price
AN30032N (40 lb. Can).....	\$ 8.80
AN31360N (120 lb. Drum).....	25.20
AN31573N (230 lb. Drum).....	46.00
AN31361N (410 lb. Drum).....	77.90

WETTING AGENT

For cotton pickers

Adding a wetting agent to the water in the moistening system permits using less water for cleaning spindles—resulting in dryer and better grading of cotton.

1-Gal.	Price	5-Gal.	Price
AN30975N	\$3.00	AL1112N	\$14.50

DURA-CUSHION DOFFERS

These doffer plates are made of light, tough cast aluminum with wide lugs bonded to the plate for longer wear. Higher speed is permitted for a faster, cleaner doffing action. Dura-Cushion Doffers are flexible, reducing wear on the outer edge.

CHAINS

Each link is manufactured to close dimension tolerances for maximum bearing area. This assures uniform, straight chain assemblies that run true. The hooks at the ends of the links are precisely shaped to prevent fatigue breakage, and correctly offset to reduce side-to-side slippage between links. This John Deere design provides longer, more even wear.

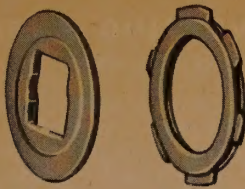

We also stock shovels, shaker sprockets, cone rollers, and bearings. See us for keeping your potato diggers and beet harvesters in tip-top operating condition.

GYRAMOR BLADES AND BOLTS

Need new blades? See us for heat-treated, alloy-steel, dependable blades that turn wasteland growth into a fine mulch to protect new seedlings and conserve moisture without smothering grass. Each knife is carefully balanced to assure better, safer operation. Straight, suction or pickup blades are available to meet your job requirements. Extra heavy bolts anchor the blades.

TIRE PUMP \$21.72

Pumps only clean, fresh, safe air

This pump works smoothly off the PTO shaft... gives long, dependable service. It saves time, hard work, and money by providing immediate air service when it is needed. There's no spark plug to remove; and there's no chance for

oil or fuel sprays to damage tires, for only fresh, clean, safe air is pumped.

The simplicity of design and low upkeep costs mean many years of service. Buy a John Deere Tire Pump on your next trip. Ask for part number J15373C—it fits any tractor with 1 3/8" spline PTO operating at 540 rpm. For tractors with 1,000 rpm, also order C11102C (\$5.96) adaptor.

STORAGE PROTECTION KIT

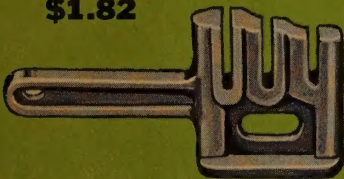

Here's a kit for protecting engine, hydraulic and fuel systems from corrosion during storage. Included are

the inhibitor, sealing bags, tape and the necessary instructions to keep your equipment in tip-top shape during storage.

"Only Genuine John Deere Parts
Fit and Wear Like the Originals"

PAINT

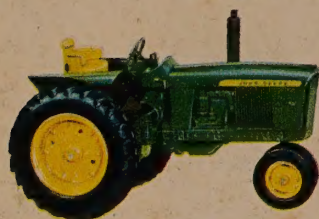

Prolong equipment life and help prevent rust damage by repainting with original equipment colors. Genuine John Deere Paint will match the original in color and durability; it is the same high-quality product and yet is low in price.

The soft black coating was developed for protecting plow bottoms, sweeps, coulters, etc., to eliminate the need for applying grease or oil to preserve the land polish. It's easy to apply, comes off slick as a whistle, and parts scour clean.

The paint and decal remover is ready to use as comes from the can. It is an easy, fast, safe and clean method for removing paint, varnish, enamel and decals.

SIX NEW SERVICE ITEMS

Cooling System Cleaner with Detergent

This two-step, cleaning and conditioning compound quickly dissolves and removes rust, scale, grease and sludge from radiators and engine blocks. Make removal of residue faster and easier.

PT500 \$1.23

Penetrating Oil Spray

Fine-quality ingredients permit this oil to penetrate tight, hard-to-crack joints. Spray it on . . . frozen nuts, bolts, and other such parts are freed. It is easy to apply and there's no offensive odor.

PT501 98¢

Liquid Gasket Maker (Brush-on Type)

This general-purpose gasket maker forms a non-hardening elastic seal which prevents seepage, seizure and loss of pressure. It is resistant to heat and solvents and the effects of gasoline and oil.

PT502 74¢

Carburetor Cleaner and Engine Conditioner

This modern, high-quality product solves annoying carburetor and mechanical problems. It removes engine and fuel system deposits that can cause stalling, rough idling, and high fuel consumption. "Lost" power is restored.

PT503 \$1.25

Cooling System Sealer

Here's a fast-acting, quality liquid to permanently seal leaks in radiator and engine blocks. It includes rust inhibitor and withstands high cooling system pressures. It's easy to use and non-injurious to parts.

PT504 55¢

Vinyl Electrical Tape

More strength with less bulk gives this tape the advantage over others. It adheres quickly to irregular shapes and surfaces . . . resists scuffs and punctures. There are three sizes to choose from . . . most prefer the large roll with the cutter bar dispenser.

Roll of Tape	Price
TY5000 (1/2" x 150-inch)	\$.26
TY5001 (3/4" x 20')	.54
TY5002 (3/4" x 66' with cutter-bar dispenser)	1.29

Think equipment care NOW—
See us for fast, sure John Deere Service
